FOR PREMIUM CLASS ”

POLSTAR
HI-SPEED FAN

OUR VALUES

At **Polstar**, our foundation is built on timeless principles that guide every step of our journey. We believe in integrity, honesty, and ethical business practices, ensuring transparency in everything we do. Rooted in simplicity and hard work, we are committed to delivering excellence through innovation, quality, and customer satisfaction.

We value the trust our customers place in us and strive to uphold it by maintaining high manufacturing standards, in-house quality control, and continuous improvement. Sustainability is also at the core of our operations, as we focus on energy efficiency, responsible production, and environmental care.

OUR MISSION

Our mission is to innovate and deliver high-performance cooling solutions that enhance everyday living. We aim to create products that combine advanced technology, superior performance, and modern design, catering to the evolving needs of our customers.

Driven by a deep understanding of market demands, we are committed to providing reliable, efficient, and durable products while maintaining the highest standards of quality and service. At Polstar, we don't just manufacture fans—we create comfort, trust, and lasting experiences for every household.

OUR VISION

Our vision is to become a leading and future-ready brand in the electrical fan industry, recognized for innovation, quality, and customer-centricity. We aspire to continuously evolve by embracing global standards, advanced technologies, and sustainable practices.

We aim to expand responsibly while staying true to our core values, delivering products that bring comfort, reliability, and satisfaction to millions of lives. Our goal is to shape a cooler, better tomorrow by consistently exceeding customer expectations and building long-term trust.

“Honoring the Roots of Our Vision”

Late Shri Fulchandji Agarwal & Late Shri Shanti Devi Agarwal.

DIPAK AGARWAL

Chairman, Polstar Fans

At **POLSTAR**, our journey is not merely about manufacturing fans—it is about creating comfort, enhancing everyday living, and delivering trust that stands the test of time.

My journey began in 1977 as a small trader in Kolkata, guided by the timeless values imparted by my father, Late Shri Fulchand Agarwal—simplicity, integrity, and relentless hard work. Over the decades, these values have remained the cornerstone of everything we do. What started as a humble vision gradually evolved into a mission: to innovate and provide high-performance cooling solutions tailored to the needs of our country.

In 1998, we took a decisive step forward by introducing high-speed fan technology—an innovation born out of deep market understanding and a desire to serve the common man better. Since then, Polstar has continuously evolved, embracing technology, design excellence, and global standards to deliver products that combine performance with aesthetics.

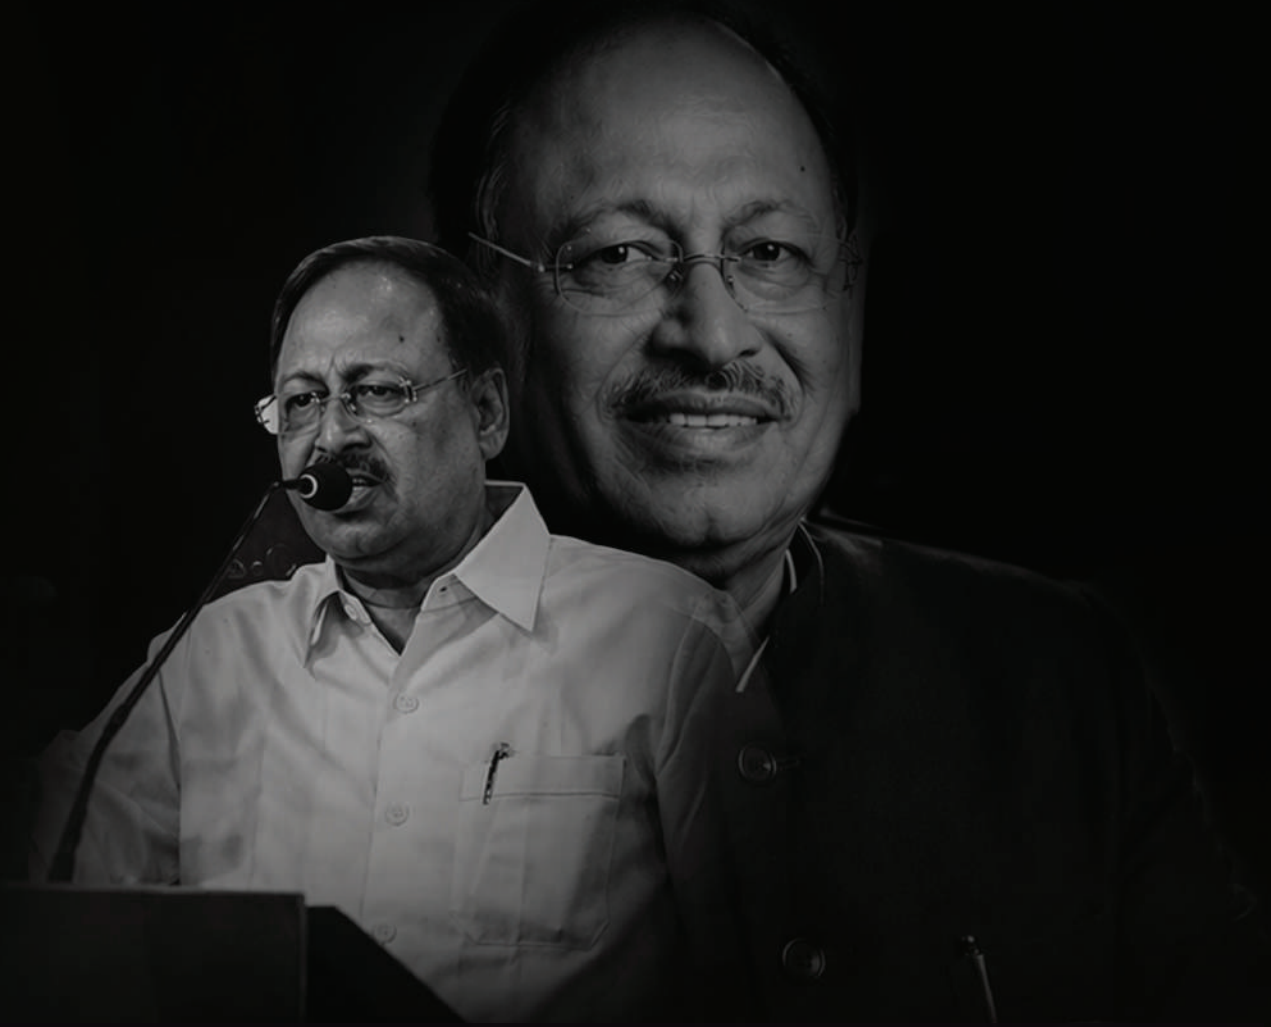

At the heart of our growth lies a simple philosophy—customer satisfaction through quality, innovation, and ethical business practices. We believe that true success is not measured only by scale, but by the trust we build with every household we serve.

Today, I take immense pride in seeing the next generation carry this vision forward. My elder son, Dev Agarwal, and my younger son, Ayush Agarwal, stand beside me as pillars of strength, bringing fresh energy, modern perspectives, and a shared commitment to excellence. Together, we are shaping Polstar into a future-ready organization while staying rooted in our core values.

As we look ahead, our focus remains clear—to innovate continuously, expand responsibly, and uphold the highest standards of integrity. We are committed to delivering not just products, but experiences that bring comfort, reliability, and satisfaction to millions of lives.

I extend my heartfelt gratitude to our customers, partners, and team members for their unwavering trust and support. It is this collective belief that powers our journey forward.

Together, we will continue to create a cooler, better tomorrow.

Mr. Dipak Agarwal is a visionary entrepreneur and the driving force behind Polstar Fans, a brand that has grown into a respected name in India's electrical fan industry. Born in 1960 in Chandannagar, West Bengal, into a middle-class family, he was profoundly influenced by the values instilled by his father, Late Shri Fulchand Agarwal—simplicity, integrity, hard work, and ethical conduct—which continue to guide his personal and professional journey.

He began his business career in 1977 at Kolkata's Poddar Court electrical market, starting as a small trader in his family's electrical goods business. Through years of hands-on experience, he developed a deep understanding of market trends and consumer needs. Recognizing the impact of India's climatic conditions and the growing demand for better cooling solutions, he envisioned a new generation of high-performance fans.

This vision materialized in 1998 with the introduction of advanced high-speed fan technology, developed through extensive research and collaboration with leading technocrats and international partners. With innovations such as aerodynamically balanced blades, robust motors, and aesthetically appealing designs, Polstar Fans carved a niche in the market and set new benchmarks in performance and style.

Under Mr. Agarwal's leadership, the company has built a strong foundation rooted in innovation, quality, and customer satisfaction, while maintaining a work culture aligned with international standards. He is a firm believer in ethical corporate governance and has consistently upheld principles of transparency and long-term value creation.

Today, carrying forward his legacy and vision, his two sons play pivotal roles in the business. His elder son, Dev Agarwal, stands as his right hand, contributing significantly to strategic growth and operational excellence. His younger son, Ayush Agarwal, complements the leadership as his left hand, bringing fresh perspectives and energy to the organization. Together, they represent the next generation of leadership, strengthening the company's future while upholding its core values.

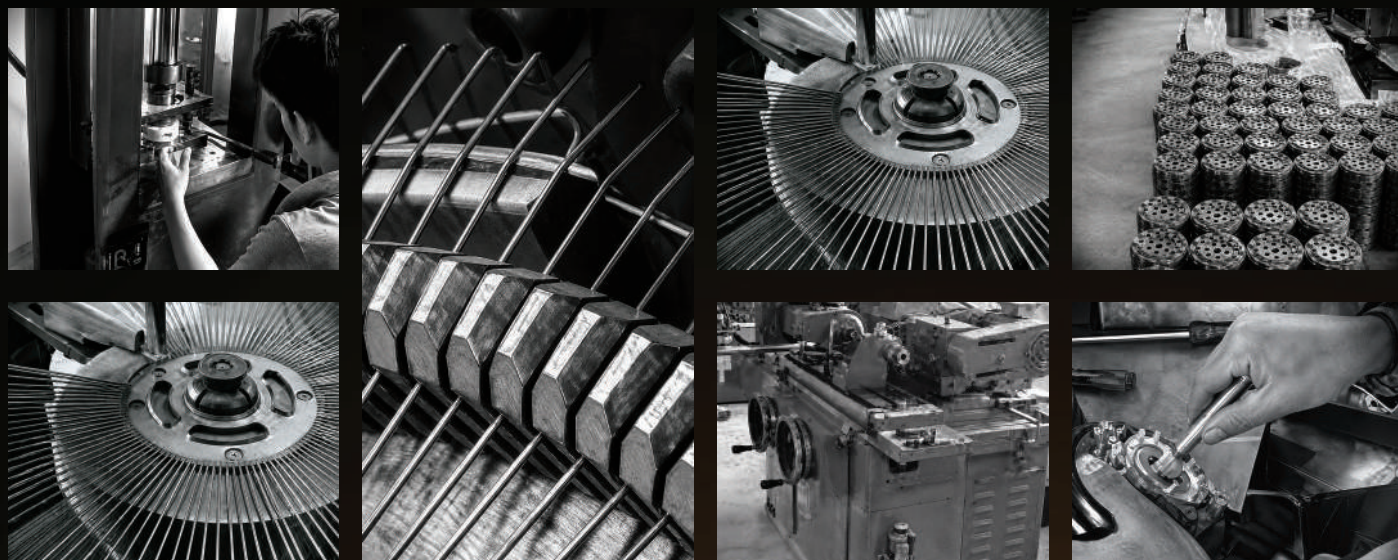

Mr. Dipak Agarwal's journey from a small trader to an industry leader is a testament to his resilience, foresight, and unwavering commitment to excellence. His legacy continues to inspire, not only within the organization but across the industry.

ABOUT US

POLSTAR is a vision which took shape over two decades ago, a visionary seed which was planted in the mind of a trader Mr. Dipak Agarwal living in the village of "chandannagar" in the west Bengal state of India". He was born in a middle class family in 1960, with the Indian ethos and the teachings his father Late Shri Fulchand Agarwal had given, which continued to have a great impact in his life & outlook. He is a staunch believer in simple living, hard work, honesty and integrity and ethical corporate governance, and upheld these standards for the decades of his life. He begins his business career in 1977, from the electrical market at Poddar Court, Kolkata where he was a small trader in electrical goods of existing family business.

Being a fan trader since 1977 in Kolkata, he felt the future demand of a new generation fans, especially in the coastal belt of India. India was developing with money power parallel to the global warming as India is a developing nation & physical labor in day to day life to earn their living played an important role. After a day hard work a human body needs rest & a deep sleep with a high breeze to quench their sweat to rejuvenate them to earn their living for next day. He understood the need of common man & knew it was a part of living. At the time when most of the industry was happy with the trading model to earn profits, all in same flow of low speed technology an innovation & new idea gave birth in mind of Mr Dipak as God's gift to Fan industry.

A new product in electrical Fan segment was given birth in year 1998 with a Hi Speed technology after a long technical R & D work under Mr. O P Uppal with the renowned technocrat Mr. Digvijay Singh – currently the head of Polstar Fans. The fans were specially designed with aerodynamically balanced blade, Heavy duty motors under technical collaboration with sum good Taiwan companies to get a flawless result. Beautiful designs were introduced giving them all size ranging from 6" to 18" in segment of TPW – (Table Pedestal & Wall-Fans). Seeing the market choice beautiful phantom colours were selected to match it with home décor with an able guidance of good home interior houses. We have created and sustained a work culture that is inspired by the international standards.

FOUNDATION

POLSTAR is a manufacturing-oriented organization of electrical fans that works on the principle of 'Make in India'; we do not focus on productivity alone. We work towards creating harmony between manufacturing output and efficiencies that deliver social, economic and environmental sustainability. We have adopted world-class technology and automation to ensure that we produce our goods efficiently with emphasis on conservation of energy water in a sustainable manner. We pursue methodology of total quality management to improve product quality with in- house production of motors & other parts.

We have lined up a system of production which is chained up from procurement of raw materials till dispatch of finished goods. All raw material received are sent to our lab for quality check randomly of every lot received to ensure our confidence on both supplier & product. We believe our customer has invested their trust on us which can never break. Our factory has been branched with several departments where all parts are manufactured before it is sent for final assembly to give it a final shape.

The main soul of a electrical fan lies in motor; we manufacture all motors in-house with best quality copper & stamping, along with best related raw materials to give the motor strength & life. All motors are 100% tested to ensure the quality standard & safety with best testing equipments to ensure any leakage of current & the record is kept in QC (Quality Control) department keeping in mind future after sales if any.

Our in house production of all molding items used in our fans help us to keep tight supervision on quality check of raw material to avoid any mixing of B grade or non virgin resins. This ensures good strength to the material & luster, at the end beauty matters.

We do specialize in TPW – (Table Pedestal & Wall-Fans) segment & to overcome the mismatch quality of outer guard of fans we have installed an automatic guard manufacturing plant in-house, it has been procured from Taiwan where our team had visited to check the production and get trained to run the machine in our factory. It is one of the main USP that sparks our quality standard. Beauty is what a customer's eye catches at first & to give it an attractive look we have installed with an automatic powder coating plant, it ensure the calibration of color to avoid mismatch. It helps us in giving a faster, safe & better output. As a color variation in any product makes the final product useless.

We do have a good technical knowledgeable staff that ensures us with final assembling with their patience & workmanship, ensuring every step of technical check & record maintenance. They are our real pillars whose eye of prey keeps all dust & negligence away. Their work makes POLSTAR a flagship brand with a platform of confidence.

Our beautiful colored box & strong safety packing helps our product to reach our valued customer safely.

Every achievement here is a story of consistency.

A woman with long dark hair, wearing a light green kurta and white trousers, is sitting on a beige sofa. She is looking towards the right with a slight smile. To her left is a black pedestal fan with a red grille and three red blades. The fan has 'POLSTAR' and 'PO'S KLIP' written on it. The room is decorated with a framed picture on the wall, a potted plant on a wooden shelf, and a small round wooden table with a book and a plant in front of the sofa. The text 'Pedestal fans' is overlaid on the image in a large, elegant serif font.
